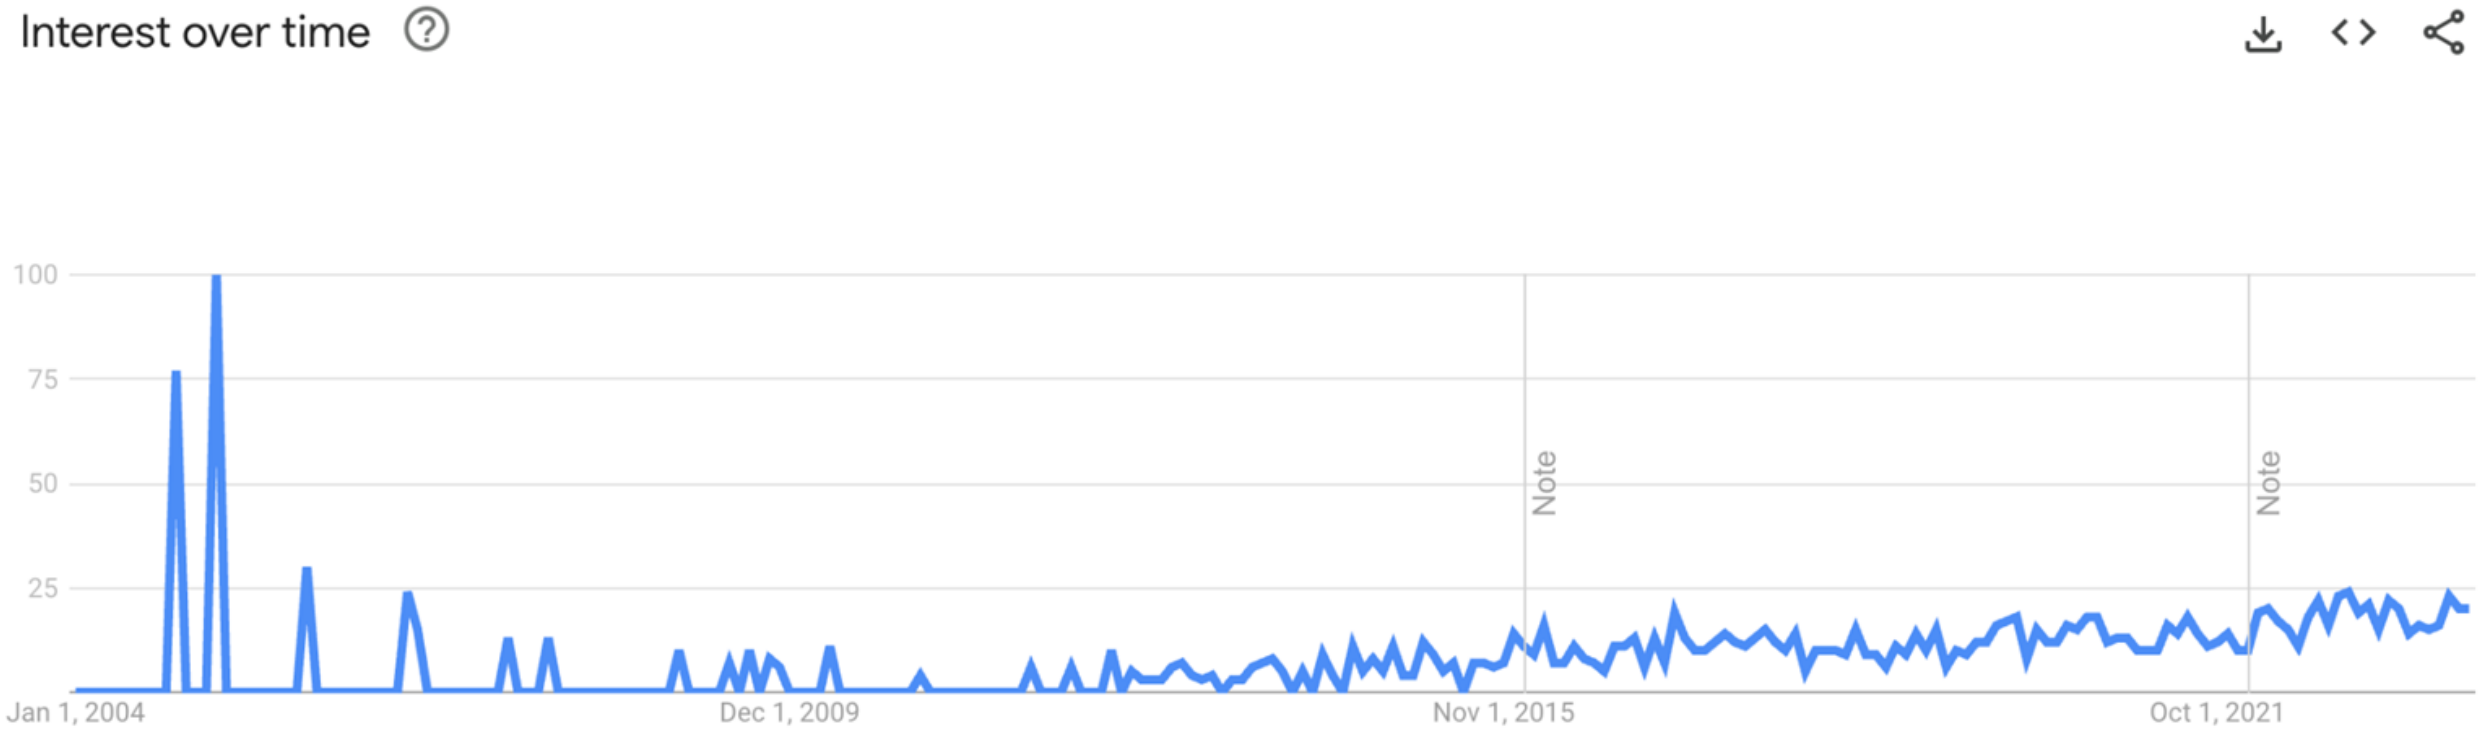
het debacle van de Drone

Drone for security



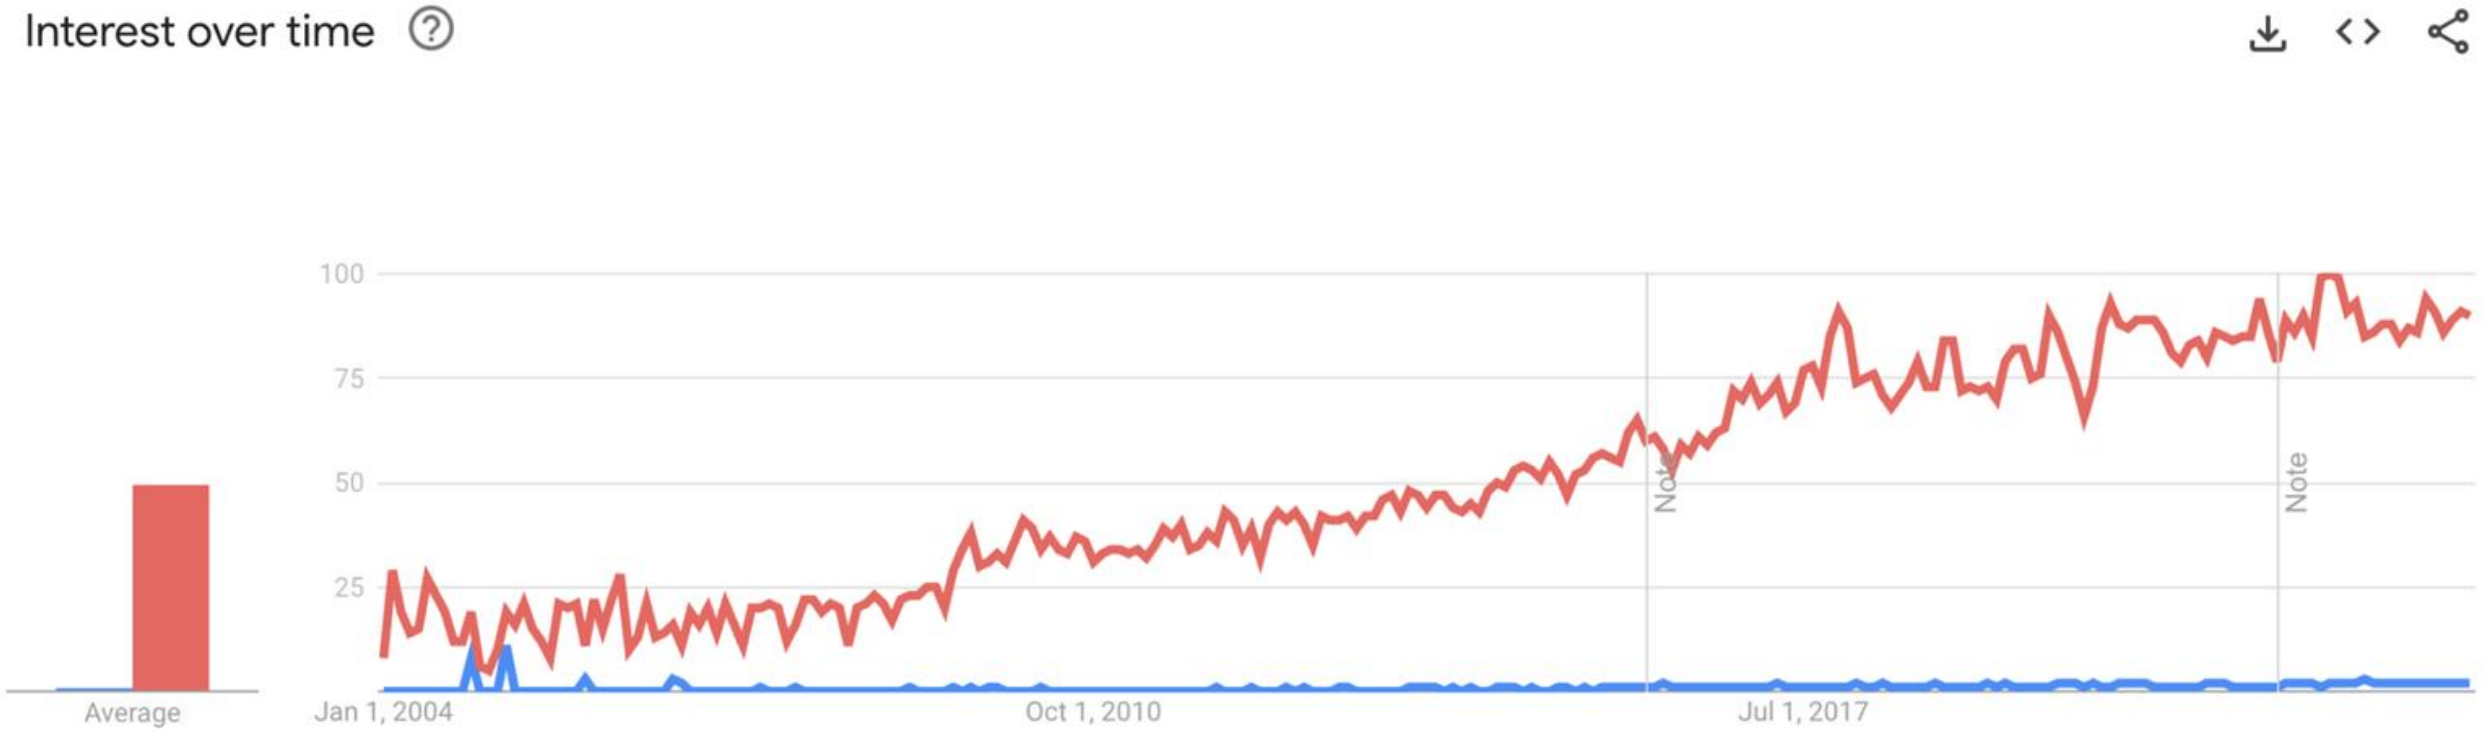
SCOOP : SERIS SECURITY LEADS THE WAY IN DRONE SECURITY IN BELGIUM

May 2018

As of June 2018, drones will be used to guard Drone Port in Brustem. SERIS Security, together with its partners Drone Port, Drone Matrix, Willemen Group, Sint Truiden City Council, and the local police and fire brigade, is at the forefront of this project. Security using drones is a milestone indicating what maximum security will look like in the near future.

> *'Constant innovation lies at the heart of our SERIS security strategy. Moreover, assessing potential dangers constantly is also important and the general social climate as regards safety has changed completely. To provide an adequate answer, it's absolutely essential to combine human resources and technology,' says* ***Peter Verpoort, division manager of SERIS Security and Monitoring.***

Drone for security vs Camera for security



Drone Security versus the Guarding Security

The global **drone surveillance** market has reached a valuation of **5,5 billion USD** in 2023.

https://www.factmr.com/report/surveillance-drone-market

The global **security** market has reached a valuation of **154.94 billion USD** in 2023.
